Dedicated University of Florida student with a passion in Computer Science, using his skills to innovate with code, data structures, and problem-solving skills.

Education:

University of Florida:

Computer Science (BS) May 2026

Astronomy (BA) May 2026

Computer Science (MS) May 2027

Cumulative College GPA - 3.8 (Cum Laude)

Skills:

Proficient Languages and Applications:

Hard Skills:

Data Structures, Database Systems, Machine Learning

Related Work Experience:

Learning Assistant Fall 2023 - Spring 2025 Florida Atlantic University

- Assisted in the facilitation and learning of nearly 100 Calculus 1 and Calculus 2 students over the course of a year at Florida Atlantic University and Multiple hundreds of students for Physics 1 with Calculus at the University of Florida.
- Used Socratic questioning and guided discovery to develop students' independent problem-solving skills, prompting critical thinking rather than supplying answers.

Management Assistant Summer 2026 Campbell Property Management

- Supported daily office operations by organizing files, maintaining accurate records, and assisting with administrative tasks.
- Updated the company's online system to ensure homeowner files and records remained current and accurate.
- Developed experience working collaboratively in a professional office environment and communicating effectively with team members.

Related Projects:

AI Hallucination Researcher Spring 2026 University of Florida

- Led a student team in building a web application that uses advisor-provided research to assess the likelihood of hallucinations in AI-generated responses.
- Supported implementation of core application features, including user input processing, AI model integration, and hallucination detection logic.

Mod Developer Summer 2024 - Current Independent Projects

- Designed and implemented multiple Minecraft and Geometry Dash extensions using Java/C++ and object-oriented principles.
- Grew and managed an active community (90+ members) on Discord, soliciting user feedback, prioritizing requests, and rolling updates that improved stability and player experience.
- Achieved 50,000+ total downloads across all mods by focusing on usability, performance, and community-driven feature development.
